

WITS Changes – 15.3.0 Release (Mental Health)

3/17/2014

In the 15.3.0 Release 3 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

- 1) Billing: User are not allowed to reject claim items with associated Add-On codes **Resolution:** Users are now allowed to reject and add a rejection reason for a claim item with an associated Add-On code.
- 2) Reports: Yellow screen error & other issues are occurring with the Discharge Data and Program Client Movement reports **Resolution:** A yellow screen error no longer occurs when running the Discharge Data report with no filters. Also, the Program Client Movement report can now be run across all agencies.
- 3) Billing: Claim item incorrectly being marked as 'Primary' when a corresponding Add-On is deleted.
Resolution: Claim items will no longer be marked as 'Primary' after corresponding Add-Ons are deleted.

Below you will find a summary of the changes to WITS for the 15.3.0 release (which took place April 17, 2014). This release was pushed with the 15.4 release. The top right portion of your screen will say 15.4.0.
